

WARRIORS

HOPE

"Early Detection saves Lives"

ABOUT US

Warriors of Hope Foundation is a community-based organization that aims at creating awareness about breast and cervical cancer at grassroot levels through psychoeducation and clinical assessment outreaches, ensuring that individuals in the community are able to have an equal opportunity to prevent, treat, treat and survive cancer. Our vision is to make preventable knowledge and early detection services more accessible in communities. Our services include; breast and cervical health education, psychosocial support, mentorship programs and counselling sessions.

As certified Global Breast health educators with Know Your Lemons of U.K, we use unique pictorial lanyards in our educative sessions in both English and Kiswahili languages. We have so far done a number of outreaches in different parts of the country. We are based in Mombasa, Nairobi, Nakuru, Trans Nzoia and Bungoma.

Our services are very unique as they are holistic in nature; we are able to also make referrals for screening and treatment services, including advanced care plans, our team comprises of cancer survivors, medics and health volunteers. We share our stories and have a climatic experience with our audiences hence making a difference in the approach towards early detection and screening, breaking stigma and rigid cultural beliefs; therefore, we have embraced digital spaces like social media.
